## Technical Specifications

### Operating system environments supported for Installation of Oracle Database

| Platforms                    |   |
|------------------------------|---|
| AIX 5L Based System (64-Bit) | Linux on POWER                          |
| Apple Mac OS X (Intel)       | Linux x86                               |
| HP OpenVMS                   | Linux x86-64                            |
| HP Tru64 UNIX                | Microsoft Windows (32-Bit)              |
| HP-UX Itanium                | Microsoft Windows (x64)                 |
| HP-UX PA-RISC                | Microsoft Windows Itanium (64-Bit)      |
| IBM z/OS (OS/390)            | Solaris Operating System                |
| IBM zSeries Based Linux      | Solaris Operating System (x86)/(x86-64) |
| Linux Itanium                | Retail Data Model Release Notes         |

## Clients Supported

| Rich Internet Application | Flavours                       |
|---------------------------|--------------------------------|
| WPF .NET                  | XP/VISTA/WINDOWS 7 (32-64 bit) |

| Browser on Windows Platform | Flavours |
|-----------------------------|----------|
| Internet Explorer           | 6+       |
| Firefox (Mac/Windows)       | 3.6+     |

## Databases supported for Data Acquisition

| Gateway  | Timeframe |
|--|-----------|
| SQL Server 2005/2008                                       | Now       |
| Teradata 10/11   | Now       |
| Oracle Exadata   | Now       |
| EMC Greenplum  | Q1.2012   |
| Sysbase  | Q1.2012   |
| IBM Netezza  | Q1.2012   |
| Microsoft PDW (parallel data warehouse formerly DATAlegra) | Q1.2012   |
